

Sub. Science Day
Class. 5th
Chapter - 1

Give any one example of a carnivore.
Tiger, Lion, leopard.

What kind of front teeth do rabbits have? How do they help them?
Rabbits have strong front teeth which help them to bite food such as carrots easily.

What is a food chain?
Plants and animals are linked to each other by eating and being eaten. This is called a food chain.

Written by A. Shaker, Wild Cat
lion. This creates a good idea.
