Ch-3

Q1. What happens when we breathe in?

A. Our chest expands when we breathe in.

Q2. Why is it essential for us to breathe?

A. Breathing provide your body with necessary oxygen.

Q3. Explain the exhaled air contains water vapour.

A. Because exhaled air has no oxygen at all.

Q4. Why do we breathe faster when we run or do physical activity?

A. Because during exercise, your lungs and respiratory system must provide more oxygen to the blood.
