CLASS WORK (Continue)

### Introduction

1. Successor :- The Number just after a given number is its successor. We add 1 to a number to get its successor.

2. Predecessor :- The number just before a given number is its Predecessor. We subtract 1 from a number to get its Predecessor.

eg :-

Successor  
 $245 + 1 = 246$   
 $392 + 1 = 393$   
 $411 + 1 = 412$   
 $599 + 1 = 600$   
 $1250 + 1 = 1251$

Predecessor.  
 $245 - 1 = 244$   
 $392 - 1 = 391$   
 $411 - 1 = 410$   
 $599 - 1 = 598$   
 $1250 - 1 = 1249$

## HOME = WORK

Q.1 Complete the table

	Predecessor	Number	Successor
1		1999	
2		2459	
3		3810	
4		4516	
5		6990	
6		2999	
7		3598	
8		7199	
9		4399	
10		999	
11		1649	
12		4200	
13		3586	
14		3000	
15.		2500
