Good Memory

A computer has a huge memory to store things. It can remember and store large amount of information.

Never Tired or Bored

We cannot work for hours. But, a computer does not get tired at all. It can work for long hours without taking rest.

A computer never gets bored in doing the same work again and again, whereas a man gets bored in doing same work repeatedly.

LIMITATIONS OF COMPUTERS

A computer is a powerful machine but it has certain limitations.

- ◆ A computer cannot take decision on its own.
- ◆ A computer works only when it is instructed.
- ◆ A computer does not have feelings like us.
